

# Artificial Intelligence (AI)

A program made by people that makes computers do things that seem intelligent (or smart) in the same way that humans are intelligent

# Examples of AI

Toy Pet

Self-Driving Car

Play these two videos and discuss the questions on the next slide

# Do you think the pet and the car in the video were artificially intelligent?

- 👉 Could they *understand* their environment
- 👉 Could they *learn* new knowledge and skills
- 👉 Could they *plan* and make decisions
- 👉 Could they *interact* with humans and the environment
