Final Project: Unit Plan

SEDC 73600 Curriculum Design

Hunter College, Fall 2022

# Impacts of Artificial Intelligence and Machine Learning: How the A.I. BOTS in Our Lives Learn

Lesson 10: Final Project in Scratch Jr. How would your A.I. learn? (Vanessa):

#### **Learning Target:**

- Students show understanding of how Al learn; images, sound, and text.
- Students will demonstrate block based programming skills through Scratch.
- Students uses a variety of computer science vocabulary.

#### Standards:

K-1.CT.2 Computational Thinking - Data Analysis & Visualization

Identify different kinds of data that can be collected from everyday life.

2-3.IC.1 Impacts of Computing

Identify and analyze how computing technology has changed the way people live and work.

#### 2-3.IC.3 Impacts of Computing

Discuss and explain how computing technology can be used in society and the world.

#### 2-3.IC.5 Impacts of Computing

Identify and discuss how computers are programmed to make decisions without direct human input in daily life.

4-6.CT.1 Computational Thinking - Modeling & Simulation

Develop a computational model of a system that shows changes in output when there are changes in inputs.

# Introduction/Hook (I Do):

Teacher introduces 2 to 3 days culminating project to complete on Scratch. A checklist will be provided for students to follow to complete the project. Students will pick one of the 3 ways Al learns. In the Scractch project, the students will use sprites to show how an Al can learn and what data set Al will be provided to show what the Al has learned.

### (We Do):

The teacher will go over the basic components of Scratch and discuss with the students what are some blocks they will consider to use for images, voice, or text.

### **Independent Activity (You do):**

Students will work on the Culminating project on Scratch.

Wrap-Up-Debrief/Reflection: How do you want to be assessed? Peer or Self Assessment

## **Conversation Talk about the activity with your peer (Peer Assessment)**

- What are some blocks you used for the program?
- What are some struggles?
- What are some AHA moments?

# **Exit Ticket (Self-Assessment) Choose one question to answer**

- What have you completed on your project?
- List 3 blocks you are using often in your programming.
- What did you enjoy most about this project?
